

37333

STATE OF MASSACHUSETTS )  
: SS.:  
COUNTY OF BARNSTABLE )

LAWRENCE V. ROTH LISBERGER, of full age, being duly sworn according to law, upon his oath deposes and says:

1. I reside at 704 Millstone Road, R.R. #2, Brewster, Massachusetts; formerly of 186 Stahl's Way, North Plainfield, New Jersey.

2. I was Plant Superintendent of the National Gypsum Company plant in Millington (Passaic Township), Morris County, New Jersey from 1954 until closing in 1975.

3. National Gypsum Company operated the plant from 1953 through 1975.

4. At the time I joined National Gypsum Company in 1954, I noticed mounds of waste material on the property adjacent to the Passaic River. The mounds were square in nature. I was told they were created by a settlement process where the waste was retained and allowed to build into mounds. The clean water after filtering was put back into the Passaic River. It was apparent that the piles were created by prior owners of the plant and nothing had been added to them for several years. Nothing was added to them during my term of employment with National Gypsum Company.

5. The mounds had been previously landscaped and were

11

maintained in such order during National Gypsum Company ownership.
